## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2004/001745

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)							
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:							
1. Claims Nos.:							
because they relate to subject matter not required to be sear	ched by this Authority, namely:						
	0.00						
2. Claims Nos.:							
because they relate to parts of the international application an extent that no meaningful international search can be can	that do not comply with the prescribed requirements to such ried out, specifically:						
· · · · · · · · · · · · · · · · · · ·							
*							
3. Claims Nos.:							
because they are dependent claims and are not drafted in ac	cordance with the second and third sentences of Rule 6.4(a)						
Box No. III Observations where unity of invention is lacking (Cor	itinuation of item 3 of first sheet)						
This International Searching Authority found multiple inventions in this international application, as follows:  See Supplemental Box							
1. As all required additional search fees were timely paid by the searchable claims.	ne applicant, this international search report covers all						
2. X As all searchable claims could be searched without effort jupayment of any additional fee.	stifying an additional fee, this Authority did not invite						
3. As only some of the required additional search fees were tin covers only those claims for which fees were paid, specifications.	nely paid by the applicant, this international search report						
4. No required additional search fees were timely paid by the restricted to the invention first mentioned in the claims; it is	applicant. Consequently, this international search report is covered by claims Nos.:						
* *							
Remark on Protest	companied by the applicant's protest.						
No protest accompanied the payment of additional search fees.							

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2004/001745

#### Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

#### Continuation of Box No:

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to from a single general inventive concept. Incoming to this conclusion the International Searching Authority has found that there are two inventions:

- 1. Claims 1-16 are directed to software or a computer readable medium in which the media file is completely received before being unencrypted and displays the media. This comprises a first "special technical feature".
- 2. Claims 17-20 are directed to a method of transferring a first and second media file at specific times. This is considered to comprise a second separate "special technical feature".

Since the abovementioned groups of claims do not share either of the technical features identified, a "technical relationship" between the inventions, as defined in PCT rule 13.2 does not exist. Accordingly the international application does not relate to one invention or to a single inventive concept.

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
